My Portfolio: <https://henryoile.github.io/MYPORTFOLIO/>

PROFESSIONAL SUMMARY

Entry-level software developer with hands-on experience building data-driven web applications, relational databases, and AI-assisted content systems. Strong foundation in Python, SQL, and frontend technologies, with demonstrated leadership, collaboration, and communication skills developed through global programs and project-based learning. Adept at translating abstract ideas into functional products and contributing effectively within fast-paced, team-oriented environments.

TECHNICAL SKILLS

- ❖ **Languages:** Python, SQL, HTML, CSS, JavaScript
 - ❖ **Databases:** MySQL (schema design, queries, normalization)
 - ❖ **Tools & Platforms:** Git, GitHub, VS Code, AI-assisted development tools
 - ❖ **Concepts:** Data modeling, CRUD operations, version control, prompt engineering fundamentals
 - ❖ **Other:** Technical documentation, requirements analysis, cross-functional collaboration
-

PROJECT EXPERIENCE

Portfolio Website

- Developed a responsive personal website using HTML and CSS and JavaScript to showcase projects and technical skills.
 - Optimized layout for clarity, accessibility, and recruiter review.
-

Airbnb-Reservation System (Team Project | GitHub Contributor)

- Contributed to a forked Airbnb-style reservation system as part of a collaborative development team.
 - Implemented and refined application features while following existing codebase conventions.
 - Used Git and GitHub for version control, issue tracking, and pull-based collaboration.
 - Gained hands-on experience working in a multi-contributor environment similar to real-world engineering teams.
-

Data Analysis with Pandas & Matplotlib

- Analyzed structured datasets using Python and pandas to clean, transform, and extract insights.
- Created visualizations with matplotlib to communicate trends, distributions, and key findings.
- Applied data-driven reasoning to support conclusions and improve interpretability of results.
- Demonstrated foundational data science workflow from raw data to visual output.

EXPERIENCE

Software Developer (Trainee) - Power Learn Project (PLP) Africa

Feb 2024 – Present

- Built full-stack practice projects using Python, SQL, HTML, CSS, and JavaScript.
- Designed relational databases to support scalable application logic.
- Collaborated in peer-based development environments using Git and GitHub.
- Applied clean code practices and produced clear technical documentation.

Aspire Leaders Program (ALP)

Feb 2025 – Present

- Developed leadership, teamwork, and problem-solving skills through structured global learning modules.
- Collaborated with diverse, international peers on discussions and applied challenges.
- Strengthened professional communication, self-direction, and ethical leadership competencies.

Technical Writer (Freelance)

Feb 2017 – Present

- Produced structured technical documentation supporting software and database-related topics.
- Used AI-assisted tools to streamline research and drafting while maintaining accuracy.
- Demonstrated precision, clarity, and audience-aware technical communication.

Teacher - Brownhill Secondary School

2017 – 2019

- Designed lesson plans, delivered instruction, and evaluated performance outcomes.
- Built strong mentoring, communication, and analytical skills transferable to engineering teams.
- Explained complex concepts clearly to learners with varied backgrounds.

EDUCATION

Software Development Program -- Power Learn Project (PLP) Africa

Feb 2024 – Present

- Expected Graduation in 2026.

Bachelor of Science in Land Resource Planning & Management – JKUAT

2017 - 2021

- Coursework completed; program paused due to financial constraints
